PROFESSIONAL SUMMARY

Technical Lead and Senior Software Engineer with **8+ years of experience** architecting and delivering scalable backend systems, microservices, APIs, and cloud-native platforms using **Node.js and TypeScript**. Led engineering teams and owned systems from architecture through production, with deep experience in **distributed systems, performance optimisation, event-driven architecture, and U.S. healthcare platforms**. Drove platform modernisation, engineering standards, developer productivity, and **AI-assisted workflows** across teams.

TECHNICAL SKILLS

Languages & Backend: TypeScript, JavaScript, Node.js, Deno, NestJS, Express.js, REST, GraphQL, gRPC, WebSockets

Architecture & Data: Distributed Systems, Microservices, Event-Driven Architecture, MongoDB, PostgreSQL, MySQL, Redis, Elasticsearch, Kafka

Cloud & Infrastructure: AWS (Lambda, EC2, API Gateway, S3), GCP (Pub/Sub, Cloud Storage), Firebase, Docker, Kubernetes, Nginx, CI/CD

Security & Healthcare: OAuth 2.0, JWT, SSO, RBAC, API Security, HL7, FHIR, ETL, Healthcare Interoperability

AI & Engineering: LLMs, AI Agents, RAG, MCP, Tool Calling, LangChain, Prompt Engineering, n8n, Jest, Mocha, Supertest, Cypress, SonarQube

PROFESSIONAL EXPERIENCE

Sorice Solutions, Kochi - *Technical Lead*

Feb 2020 - Nov 2025

- Architected and delivered scalable backend platforms for the **4medica suite of U.S. healthcare applications**, owning architecture, reliability, security, and production readiness.
- Led a **10-member engineering team**, driving technical decisions, delivery execution, code quality, and engineering standards.
- Built healthcare interoperability workflows using **HL7, FHIR, ETL pipelines, and interface engines** for reliable clinical data exchange and transformation.
- Designed REST APIs, microservices, and event-driven services using **Node.js** and TypeScript, with JWT, OAuth, SSO, and RBAC for secure enterprise integrations.
- Improved API performance by **25%** through profiling, query optimisation, and architectural improvements.
- Migrated a legacy LoopBack application to **NestJS**, standardising the technology stack and engineering conventions while reducing feature and maintenance effort by **20%**.
- Built cloud-native workloads across **GCP, Docker, and Kubernetes**, and streamlined multi-environment deployments and production releases.

- Owned **production-critical incident resolution** and security remediation across services, databases, infrastructure, and external integrations.
- Drove **AI-assisted engineering** adoption and built internal developer tooling to automate repetitive work and accelerate development workflows.
- Led architecture and code reviews, mentored engineers, and interviewed **300+** candidates, strengthening engineering quality and technical hiring.

Cubet, Kochi - *Software Engineer*

Oct 2017 - Feb 2020

- Built and shipped production **REST APIs, microservices, and serverless services** using Node.js, AWS Lambda, and Firebase Cloud Functions across multiple products.
- Published **ffmpeg-sdk**, an NPM package abstracting FFmpeg workflows for a production video transcription and dubbing platform.
- Engineered a **real-time multi-bot chat platform** with text and audio communication over WebSockets.
- Took backend systems across **media processing, e-BOM, CSR, and matchmaking** from prototype to production, owning architecture, implementation, integrations, and deployment.
- Diagnosed and resolved **production-critical failures** across applications and infrastructure, improving system reliability and operational stability.

Alt S Solutions, Kochi - *Junior Software Engineer*

May 2017 - Oct 2017

- Developed responsive web applications, CRM dashboards, and backend APIs for client projects.

EDUCATION

T John Institute of Technology, Bangalore - *Bachelor of Engineering in CS* - 2017

ACHIEVEMENTS

Ranked in the top 2% globally in LinkedIn's JavaScript skill assessment.

HOBBY / SIDE PROJECTS

- **Clockwall** (clockwall.app) - Time zones, simplified. This virtual clock wall makes it easy to track time across different time zones.
- **Community Town Portal** (piravom.in | aroundkochi.in) - One-stop platform to discover local businesses, services, restaurants, food menus and attractions for residents and visitors.
- **Deepseek Usage Analysis Tool** (github.com/shajanjp/deepseek-usage) - A self-hosted dashboard for visualising your DeepSeek AI API usage: daily costs, token consumption, cache hit rates, and per-key breakdowns.
- **Co-Apply** ([Firefox Addon Page](#)) - An AI-powered Firefox browser extension that uses an LLM API to autofill web forms intelligently
